

Another 2008 newcomer to the winged wonders collection. This 1961 Chrysler 300 G convertible needs "a little work". But we are thrilled to have it. Equipped with factory AC and paint code LL1 (Sheffield Silver) make this a keeper. We are presently researching the factory records with Gil Cunningham, but we believe this might be the only factory 300G convertible ordered with silver paint. Stay tuned listeners, this car might come back from the brink....
